

PIPECON

Gas- & watertight deck- or bulkhead penetration

With cushions for pipe support

Stock no. 06800

Description:

This type of bulkhead penetration is designed to be mounted in a bulkhead or deck which must be gas- or watertight.

It absorbs the motion of the pipe through the bulkhead.

The 06800 type with cushions can be used as a combination of pipe support and penetration.

See also [06810](#).

Material:

- Penetration part and flange: S235JRG2
- Bellow: EN 1.4541
- Cushions: Type 94010
